Something fishy going on at the "TASIK"

Dans, shark tail.....

Here we have pictures of a baby shark Dan found in a local restaurant. It was in a tank & after telling the Manager what he was doing is illegal, Dan bought it for Rp 50,000. "We put in in water in a couple of plastic bags & whizzed it back to the resort" Once back, Monica released it back into the sea just off the beach. Happily it swam straight off!!! Its very unusual to find sharks in tanks here.

The restaurant in question will now call us if any more sharks arrive at their door and we will collect & release!!

Thanks to Nick & Judith, also Mr Satoshi Tokiwa & Family for the pictures. See you here again!!

LIDS March 2009u

Got any questions?? Come & say hello, you will find us on stand 622. Dan & Monica will be there to give you the answers. With almost 15 years knowledge between them, they will be able to help. Of course Monica was born & bred here in Minahasa, but if you think she's a bumpkin, (orang kampong) sorry, your way off the mark, with her nigh on perfect English and years of dealing with divers from around the world, not much gets past her! Dan is a London boy by origin, but after 5 years living here in Manado its his home now, and his love for the place is evident. So whether its diving related or what happens locally, ask away. One of them will know the answer!
